

Chapter 8: Future Work

Many technologies have not yet been thoroughly studied in all areas of the Region. These are clearly identified in the table in the Preface and should be given consideration for further study. In addition, the Study Group suggests further study in the following areas:

1. Economic drivers and filters
2. Technology readiness
3. Portfolios of renewable energy sources tailored to match local needs
4. Drivers and barriers for CSP
5. Covered parking for photovoltaic installations
6. Solar water heating
